Web Development:

Mentor: **Shubham Jaroli**

For 2nd year:

Project Name: InstaShare

Project Description: Create a photo sharing platform where you can post any of your photo and people can comment on your post and reply to the comment. Website will also have signup, login and logout facility. Try to host it on any of the freely available hosting platform.

Tech Stack:
Bootstrap – front-end, Django –backend, DB – Sqlite

E-mail: shubham15.jaroli@gmail.com

Mentor: **Shubham Varshney**

For 2nd yr:
Project Description: online reservation system, something similar to irctc that allows user to book tickets, check the status and pnr of tickets.

For 3rd year:
Project Description: Video membership site, Allow users to get access to preview of videos and get the full version for premium users, integrated with payment portal.

Tech Stack: Django and Java mainly, can also use php and mean.

E-mail: Shubham.07.var@gmail.com

Mentor: **Akansha Goel**
For 2nd yr:
Portfolio; Instagram kind of app.

For 3rd yr:

Portfolio for Internships;Recommendation Engine using Django(Python framework).

Tech Stack: Flexible, contact mentor for the same.

E-mail: akanksha.ausum05@gmail.com

Mentor: **Shubham sharma**

For 2nd year:

1. Travel Planner System(kind of TSP solver)

E-mail: shubham290696@gmail.com

Mentor: **Shivam Sinha**

For 2nd Year:

Canteen food ordering and management system

Description: Develop an app or a website that can be used to place orders at canteen.

For 3rd Year:

Chat application

Description: Develop a chat app that can be used to send messages to a single person as well as a group too.

Tech stack: Flexible, contact mentor for the same.

E-mail: sinhashivam04@gmail.com

Machine Learning:

Mentor:**Anjali Munjal**

For 2nd year:

Predicting the sales of a retail store from previously observed values using time series analysis.

Prerequisites – Familiarity with python or R, basic understanding of statistics.

What to study before you start – Visualization of time series data, Time series models like ARIMA.

For 3rd year:

Recommender Systems using Deep Neural Networks. The recommendation can be of movies, songs, products etc. based on the availability of data and students' interests.

Prerequisites – Artificial Neural Networks (Both Mathematical models and implementation).

What to study before you start – Content based and collaborative filtering methods for Recommendation.

E-mail: anjalimunjal001@gmail.com

Mentor: **Akanksha Goel**

2nd Year:

1)Data Analysis and Visualization using R or Python ;Any Kaggle problem statement.For Example: Titanic Data Analysis.

3rd Year:

1)Building Machine Learning\Deep Learning model on Kaggle problem statement using python.

2)Research project for those planning for further studies using Matlab/python.

Tech Stack: Contact mentor for the same.

E-mail: akanksha.ausum05@gmail.com

Mentor: **Shubham sharma**

3rd yr:

1. Recognizing the voice of singer using deep learning
2. AI technique that help people to see in darkest places

Tech Stack: contact mentor for the same.

E-mail: shubham290696@gmail.com

Mentor:**Shivam Sinha**

2nd Year

1. Image Classification, Text Classification, Recommender System
2. Canteen food ordering and management system

3rd Year

1. Extend harry potter, got story
2. Video Classification
3. Chat application
4. Alumni Manager

Tech Stack: Neural Networks, Language processing

E-mail: sinhashivam04@gmail.com

Mentor: **Siddhanth Srivastava**

Topics:

Computer Vision : image recognition/classification, facial keypoint recognition, image segmentation, image captioning.

Natural Language Processing: Sentiment Analysis/Text Classification, Document Clustering, POS-Tagging, Machine Translation.

Reinforcement learning: Stock Price predictor, Weather Forecasting.

For 2nd yr:

Making the statistical for any of the above topic using extensive data engineering (Data pre-processing and presentation). Making an ML model would be a bonus.

For 3rd yr:

Making the ML model, and also Deep Learning Model which would require stress on model selection and implementation approach.

E-mail: siddhant.srivastava11@gmail.com

Mentor: **Vishakha Chichra**

3 rd year:

1. Detection of signature forgery.
2. Finding similar repositories on github (Can be extended to finding my github clone)

Tech stack: language python, concepts: neural networks, ml algos

E-mail: vishakhachichra@gmail.com

Mentor: **Anant Upadhyay**

3rd Year :

1.) Sentiment Analysis of user/movie reviews

Tech stack: language python, concepts: natural language processing, ml algos

E-mail: anantupadhyay17@gmail.com

Python and Miscellaneous:

Mentor: **Akansha Goel**

For 2nd yr:

2)Web scraping and Data Visualizations combined using python.

3)Data wrangling using MySQL.

Tech Stack: Contact mentor for the same

E-mail: akanksha.ausum05@gmail.com

Mentor: **Shivam Sinha**
2nd Year and 3rd year

1. Flipkart/Amazon bot for ordering items automatically during big billion day.

Tech Stack: Contact mentor for the same.

E-mail: sinhashivam04@gmail.com

Mentor: **Vishakha Chichra**

2nd year

1. Carpool manager : get notified when your and your friend's (or people in contact list) travel path intersects significantly and intiate a pool request.
2. Bot : a bot to track the price of a commodity on a website and to notify as soon as the price drops.

E-mail: vishakhachichra@gmail.com

Mentor: **Anant Upadhyay**

2nd Year :

1.) Web Scrapping (Requirements: basic knowledge of python, HTML) - Mainly scrapping of pages to extract information like news headlines, cricket score.
2.) Alexa Skills (Requirements: python, flask) - Topic would be flexible (contact the mentor for the same)

E-mail: anantupadhyay17@gmail.com

Android Development:

Mentor: **Shruti Agarwal**

Project Description:

For 2nd Year:

1. Bill splitting for roommates.

2. Application for recording your goals or habits.

3. city parking finder

For 3rd year:

1. Travel tour app for an area.

Tech Stack: Contact mentor for the same.

E-mail: shrutiag95@gmail.com
